

A2
Central

a fluoro-resin film adhered with a silicone based adhesive to a portion of said metal plate where the metal plate at least contacts or is adjacent to said roller.

12. (Amended) The peeling member as claimed in claim 11, wherein the fluoro-resin film is at least one resin film selected from the group consisting of polytetrafluoroethylene polymer, tetrafluoroethylene-perfluoroalkylvinylether copolymer, tetrafluoroethylene-hexafluoropropylene copolymer, and tetrafluoroethylene-ethylene copolymer.

A3

16. (Amended) The peeling member as claimed in claim 11, wherein the silicone based adhesive comprises dimethylpolysiloxane crude rubber.

Kindly add the following claims:

A4

19. (New) The peeling member as claimed in claim 17, wherein the polytetrafluoroethylene film has a thickness of 10 μ m to 200 μ m and is surface treated.

20. (New) The peeling member as claimed in claim 18, wherein the surface of the polytetrafluoroethylene film is etched by immersing in an ammonia solution of metal sodium.

REMARKS

In paragraph 2 of the Office Action, the drawings were objected to as not clearly illustrating a critical element of the invention. Attached to this Amendment is a proposed revised drawing which includes the requested illustration. It is requested that the Examiner approve the requested drawing correction.

In paragraph 4 of the Office Action, claims 1-17 were rejected under 35 U.S.C. §112, first paragraph, as
